

STATEMENT OF COMPLIANCE

In order to improve the quality of professional training and qualification in the area of ICT Sector at European level, and to support the efforts of the VETQI consortium in attaining its quality goals, I, the undersigned, declare that my organization complies with the principles and practices stated herein, namely

- The labour market in the ICT sector is regularly and systematically analysed in order to identify valid and current market needs for crucial skills and competences.
- Training processes should be aimed to reach quality assurance high standards
- Developing a culture of quality, to be embedded at European level and other levels within the provision of training is one of the key to obtain competitiveness of Small and medium enterprises
- European Union is offering four relevant tools for training development, jobs promotions and quality assurance, namely Europass, European Qualification Framework, ECVET and EQAVET, these tools as well as national and sectoral frameworks, provides a useful mechanism to increase the transparency of training programmes in regard to learning outcomes and an improvement of training processes.
- Learning outcomes are more important for evaluating workers competences than the learning path that one takes to achieve them. Competence development in the broadest sense of the term is the top priority in training and learning. Training programmes should be expressed in terms of learning outcomes.
- Training for ICT Enterprises is to be offered following The European Quality Assurance Reference Framework for VET (the Framework) as it provides a European-wide system to help Member States and stakeholders to document, develop, monitor, evaluate and improve the effectiveness of their VET provision and quality management practices.
- Training as a goal-directed activity aims at qualifying individuals in an organised, systematic and transparent way, hence the importance of identifying training requirements through relevant role profiles and specific measures
- The so-called "Sustainable Approach" and the attention toward organisational climate are recognized as an integral part of quality assurance processes .
- The so-called "soft skills" or key competences are recognized as an integral part of every training unit, module or programme.

We strive to realize these principles in all our product and service offerings.
